- Thank you from conference Chair*

Event details

Water Reuse Europe third Conference and Exhibition on Innovation in Water Reuse will take place in Les Sables-d'Olonne. Les Sables d'Olonne is an exquisite and lively town bordering the Atlantic coast of France, in the Vendée Department, a popular holiday destination in France, but also a region now pushing innovation on water reuse with the trialling of the first French scheme reusing treated wastewater for indirect drinking water production – the Jourdain Program.

The conference is an industry focused event that will bring together professionals and organisations active in the water reuse sector for a two-day event packed with presentations from prestigious speakers, discussions, and technical visits. The conference will cover a wide range of topics including water reuse for potable applications, public health in water reuse, water reuse in agriculture, innovative solutions in water reuse, and industrial water reuse.
